

TECHNOLOGIES THAT WILL CHANGE WORK FOREVER

# INTERNSHIP

The Ceympton internship program offers the opportunity to gain hands-on experience working for a technically advanced global organization. You'll work with a team of Ceympton IT professionals using leading-edge systems and tools to create innovative solutions. You'll also get to learn more about Ceympton and future job opportunities with us as we learn more about you.

## Who We Hire

We're looking for students who are working toward a degree or higher diploma in computer science, management information systems, or a related technical or business field.

## What You'll Do

As a Ceympton intern, you'll:

Work in a team environment where you'll collaborate with others and continue to grow your skills in areas such as PHP, .NET, K2, Power Toolz, etc.

Work with leading-edge technology to meet the challenges of the energy industry. Spend your internship period learning about the energy industry and gaining invaluable experience working on challenging projects at a leading global organization.

Ceympton provides business analysis, development of soft
